DECAL PRINTING

DECAL PRINTING REFERS TO SILK SCREEN PRINTS OF GRAPHIC DESIGNS. WITH THIS TECHNIQUE COLORS CAN BE APPLIED ONTO DIFFERENT MATERIALS SUCH AS PORCELAIN, CERAMICS, GLASS AND TILES THROUGH A FINELY WOVEN GRID. AS A MANUFACTURER AND SPECIALISED COMPANY FOR HIGH QUALITY AND COMPLEX SILK PRINTING WE SERVE REKNOWN COMPANIES WORLDWIDE.

REKA - DECAL PRINTING

L'ART DE TABLE › REKA is located in the French department of Moselle just a few miles from the border of German Saarland. For more than 20 years we have been creating transfer pictures for use in the porcelain-industry. First-class quality standards are granted by years of experience in ceramic color printing.

QUALITY › Our prints are manufactured with selected materials and, of course, meet all legal health and environmental requirements. Resulting from a combination of expertise and professionalism the quality of REKA products will meet highest expectations.

OUR EXPERTISE

PRINTS › Decal Prints may be produced in multiple colors. Some REKA décors contain more than 20 colors and complex gradients. In addition, decal printing containing noble metals like high temperature gold, bright gold, brush burnish gold and platinum are one of our areas of experience. REKA also provides special effects like relief printing and sandblast effect.

MATERIALS › REKA decal prints are applicable in porcelain, bone china, ceramics, glass, tiling, enamel and stainless steel – depending on the manner of processing. In addition, our pre-press procedures, including color development and, are all-digital design..
